Testimonial Extension for Magento

Introduction:

Testimonial Extension for Magento helps sellers to organize and display customer testimonials on their Magento sites. Customer testimonials can be added, updated and deleted from the Magento admin dashboard. The Testimonial extension has a configurable widget that allows sellers to display customer testimonials on any page on the sites.

Features:

Unlimited Testimonials: Unlike others extensions, Testimonial extension by V Group does not have any limitation in adding number of customer testimonials to the site. Sellers can add unlimited customers testimonials.

Import/Export Testimonials: Sellers can upload testimonials with images in bulk from other sources through csv file. Similarly they can export the testimonials from their Magento store.

View Testimonials: On Testimonial page, the testimonials are displayed with short description and image of the customer. User can further click on a 'View more' link to view full testimonial on a separate page.

Display Settings: Display settings helps seller to configure the appearance of the testimonials on the site. Sellers can display testimonials in a List or a Grid view.

Testimonial Widget: The extension has a widget that can be added on any page of the Magento site. Seller can configure it to display desired number of Testimonials. The widget will display short description and a 'See all' link that would navigate to a page that will have the all testimonials listed. The extension also has an option to auto-rotate the testimonials.
